Description

CKA Certification Course – Certified Kubernetes Administrator

Kubernetes is one of the highest trending technology in Cloud Computing as of today. Kubernetes had the fastest growth in job searches, over 173% from a year before, as reported recently by a survey conducted by Indeed.

With our course from KodeKloud, you will be able to learn, practice, and get certified on Kubernetes with hands-on labs right in your browser, with no extra hassle.

Why You Should Learn Kubernetes

Having a CKA Certification is essential for any DevOps professional, and DevOps engineers are always in demand. Currently, the average Silicon Valley salary for a DevOps engineer is 20% higher than what a software engineer makes. DevOps engineers make an average of \$140,000 to \$200,000 annually. And one of the most in-demand skills is Kubernetes Administration.

What Is Kubernetes?

Kubernetes is an open-source system for automating the deployment, scaling, and management of containerized applications. It was originally designed by Google and is now maintained by the Cloud Native Computing Foundation.

This Kubernetes certification course helps you gain the knowledge required to design and deploy cloud-native applications on a Kubernetes cluster. A series of well-designed lectures with animation and illustrations help you understand complex concepts easily.

Practice Kubernetes With Our CKA Certification Course

Lectures alone won't help you clear the CKA certification course. The Kubernetes Certification is a practical hands-on exam that provides you with the necessary experience to properly learn

After you have completed the lectures and coding exercises, you will have the opportunity to complete a series of assignments that put your new skills to the test. You will be given a challenge to solve using the Kubernetes skills you have learned.

This will give you real-world experience and the chance to work with other students in the community. You will develop a Kubernetes deployment and get feedback to your work.

Join our Community!

Once you enroll in the CKA certification course, you will get access to our community of teachers and learners on Slack where we discuss important topics, tips, and tricks to pass the exam. This is a great place for you to clear your doubts and get answers to your questions instantly.

Sign Up For Our CKA Certification Course Today!

This course is the best way to get Certified in Kubernetes (CKA) for an Absolute Beginner.

Don't waste any more time wondering what course is best for you. You've already found it. Get started right away!

Course Update History

- May 26, 2025 – Lab environment upgrade to 1.33v (in progress)
- Feb 26, 2025 - Lab environment upgrade to 1.32v
- Jan 27, 2025 - Two new sections (Helm Basics and Kustomize Basics) added
- Oct 29, 2024 - Lab environment upgrade to 1.31v
- July 15, 2024 - Lab environment upgrade to 1.30v
- Feb 17, 2024 – Lab environment upgrade to 1.29v
- June 15, 2023 – Lab environment upgrade to 1.27v
- Feb 2, 2023 – Lab environment upgrade to 1.26v
- Oct 10, 2022 – Lab environment upgrade to 1.24v
- Sept 2, 2022 – New lab on etcd added
- May 15, 2022 – Mock Exam solution videos updated
- May 1, 2022 – Lab environment upgrade to 1.23v
- Oct 20, 2021 – Lab environment upgrade to 1.22v
- May 10, 2021 – Lab environment upgrade to 1.20v
- Aug 24, 2020 – New updates. Lab environment upgrades to v1.19. New lectures Storage Section, Troubleshooting Section, kubectl apply, and Solution videos along with labs were added. Updated Kubernetes Imperative Commands Lab.
- Jun 16, 2020 – Lab environment upgrade to v1.18
- Dec 3, 2019 – New labs added
- Jul 5, 2019 – New Mock Exam to the Kubernetes Certification Courses added
- Jun 7, 2019 – New lectures on Practice Imperative Commands, Multi Container PODs, and Init Containers, along with labs, were added
- May 21, 2019 – Lab Updates and fixes

Prerequisites for this course

Students should have a foundational understanding of Docker, basic knowledge of Linux, and familiarity with the YAML language.

Who this course is for:

- System Administrators
